

## 5TH WHEEL REPLACEMENT

### Tools Needed:

- Phillips screwdriver or
- 3 mm hex wrench

**Step 2:** Remove the 5th wheel assembly from the CaddyTrek by slightly turning while pulling wards.

**Step 4:** Insert screws and tighten firmly as shown below.

**Step 1:** Remove the 2 screws and 2 nuts attaching the 5th wheel assembly.

**Step 3:** Replace with new 5th wheel assembly making sure to align all screw holes with holes on the CaddyTrek frame.

**The End:** Congratulations, you have successfully replaced the 5th wheel assembly!
