

Tools Needed:

- Phillips screwdriver or
- 3 mm hex wrench

Step 2: Remove the 5th wheel assembly from the CaddyTrek by slightly turning while pulling wards.

Step 4: Insert screws and tighten firmly as shown below.

Step 1: Remove the (2) screws and (2) nuts attaching the 5th wheel assembly.

Step 3: Replace with new 5th wheel assembly making sure to align all screw holes with holes on the CaddyTrek frame.

The End: Congratulations, you have successfully replaced the 5th wheel assembly!
